## BACKUP CAMERA INTERFACE AND CONTROLLER

For 2014 - 2016 Mercedes Sprinter and Metris Vans with Factory 5.8" Display Radio

*Back-up camera upgrade solution*

The BCI-MB11 is a plug-n-play solution that connects to the factory 5.8" video capable radio. It has been engineered to connect to the vehicle's data-bus system and provide a video input for use with a backup camera - backup camera sold separately.

When used with a VS41, intelligent four camera switcher, up to four cameras can be added to the vehicle to eliminate blind spots and enhance visibility for a more informed driving experience - VS41 sold separately.

### PRODUCT DETAILS
